Gentlemen:
Just a few words to tell you how satisfied we are with the flowering shrubs received
from you in May. They arrived in fine condition, and now, only about five weeks since
planting, are in flower.
We hope to have another order for you next spring. Thank you.
Very truly yours,
HELEN A. LAMB

PERENNIALS

All Plants Will Bloom This Year—Two Year Field Grown

Our perennials are freshly dug—no chance for them to dry out. They are packed in moss and sent directly to you. We believe ours are larger than the average, due principally to our excellent soil and careful attention paid to proper fertilization.

For best effect Perennials should be planted in groups of three or more of a variety. Plants preceded by a * are rock plants but large enough to be grown on the margin of the hardy border, as well as in the Rock Garden. You have the privilege of mixing varieties when prices are the same.

PRICE OF PERENNIALS (Except as noted) 3 for 45c, 12 for \$1.65, 25 for \$3.25.

All Perennials Postpaid to Your Door.

Quality & Service Made It Possible

Maloneys have been growing stock since 1884. Mr. Thomas Maloney started the business. Later it was turned over to his two sons, William and Albert, who are at the head to-day. William Maloney is in charge of the office; Albert is propagating supervisor. Both are active and are at work every day of the year. These men have gradually developed the business from a small one to the largest mail order nursery in New York State. This has been accomplished solely because of quality stock and service to their customers. Our quality stock is due to Dansville's unexcelled soil and climatic conditions, plus expert supervision. Each year we try to improve on our service; today ALL WE ASK IS A TRIAL ORDER. We are positive our stock will make you a Maloney customer always.

Large, luscious fruit from small, compact trees

The dwarf fruit tree is dwarf in tree size only, with fruit that is always as large and usually larger than the fruit grown on standard size trees. It has the added advantage of being readily picked without the use of high ladders.

The dwarf fruit tree is especially adapted to the city or suburban home where large spreading standard size fruit trees are not adapted. Not only can these trees serve as useful trees but are extremely decorative as well during the spring blossoming period. They can be planted 15 feet apart, having a spread of 12 feet and every home has room for a group of these attractive fruit trees. Dwarf trees come into bearing early, in fact many of these trees have borne fruit in our nursery.

Fresh Fruit from Your Own Trees only One Year After Planting Maloney's Fruiting-Age Trees

FRUITING-AGE TREES

These trees will fruit in two years. They are extra large; in fact, many have fruited in the nursery row. Maloney fruiting age trees have been transplanted once and scientifically treated to insure you fruit on your table only one year after planting—think of it! Usually it takes an ordinary tree from four to six years to fruit. We have only a limited amount of these trees at these exceptionally low prices. Order your trees for your rear lawn or garden now.

PLANTING INSTRUCTIONS

Prune off bruised ends of roots, if any, make a smooth cut; dig hole deep enough so that the tree will be buried one inch above where it was budded on the root, or one inch above the collar—soak roots in water one-half hour, place tree in hole, fill in one-fourth, tread well; another one-fourth, tread well, the third one-fourth, tread well; then finish filling and tread firmly so that when the tree is set, it would require a strong man to pull it out.

For Pleasure and Profit Plant Plenty of Maloney's Selected Raspberries

Newburgh

RASPBERRIES

Raspberries are profitable, and it is mighty nice to be able to go out and pick a few as you want them. You can plant an acre of Raspberries, 2,400 plants, 3 feet apart and get big returns the second year, and from \$600 to \$1000 per acre thereafter. Berries require little care, and only reasonably good soil.

CHIEF (New)—Berries are dark red, good size, extra firm and hold up a long time after picking. Yields 15 to 30 per cent more than other Raspberries. Withstands dry, hot weather. Ten to twelve days earlier than Latham. **Price:** 25 for \$1.35, 100 for \$3.50, 500 for \$15.00, 1000 for \$25.00.

COLUMBIAN (Purple)—Very large, somewhat conical, rich, juicy; seed small, bears large crops. Valuable for table and canning; fruits from middle of July to August. **Price:** 25 for \$1.35, 100 for \$3.50, 500 for \$15.00, 1000 for \$27.50.

CUTHBERT (Red)—Large, conical; deep rich crimson, firm and of excellent quality; vigorous and produces fine crops. **Price:** 25 for \$1.35, 100 for \$3.50, 500 for \$13.50, 1000 for \$25.00.

LATHAM—A superb success in quality, production and profits. It has been truthfully said that Latham leaves nothing to be desired in a Red Raspberry. Berries are mammoth, dark red, of uniform size, and present a beautiful sight on the bushes and in boxes. Fruit clings to stems several days after fully ripe. Extremely hardy and Mosaic free. **Price:** 25 for \$1.35, 100 for \$3.50, 500 for \$13.50, 1000 for \$25.00.

NAPLES—New variety. N. Y. State Experimental Station considers it most promising black Raspberry that has ever fruited on their grounds. Plants vigorous and productive; fruit is large, glossy, attractive, firm and good quality. **Price:** 25 for \$1.35, 100 for \$3.50, 500 for \$15.00, 1000 for \$27.50.

NEWBURGH—New variety from N. Y. State Experimental Station. Claimed to be most promising variety in station collection. Fruit very large, firm and does not crumble. Color is bright attractive red. Plants are vigorous and hardy. Mosaic free. 3 or 4 days earlier than Cuthbert. **Price:** 25 for \$2.00, 100 for \$7.00, 500 for \$30.00, 1000 for \$55.00.

PLUM FARMER (Black)—The most profitable early market variety; maturing the entire crop in a very short period. The berries are very large, thick meat-ed; firm, attractive. **Price:** 25 for \$1.25, 100 for \$3.50, 500 for \$12.00, 1000 for \$22.50.

BLACKBERRIES

BLOWERS—Very large, finest flavor, jet black. Canes grow upright, perfectly hardy. One of the most productive starting to ripen in July and continues late. Brings the highest market price. **Rooted cuttings.** **Price:** 25 for \$1.75, 100 for \$4.50, 500 for \$17.50, 1000 for \$30.00.

ELDORADO—Largest hardy Blackberry. Free from rust. Berries large, jet black, borne in large clusters and ripen well together; very sweet, melting, no hard core and keeps for eight or ten days after picking with quality unimpaired. **Rooted cuttings.** **Price:** 25 for \$1.75, 100 for \$4.50, 500 for \$17.50, 1000 for \$30.00.

DEWBERRIES

LUCRETIA—It equals any of the tall growing sorts. Perfectly hardy and remarkably productive, with large, showy flowers. The fruit, which ripens early is often 1½ inches long by 1 inch in diameter, soft, sweet and luscious. **Price:** 10 for 60c, 100 for \$3.50.
